PROFESSIONAL EXPERIENCE

Business Development Manager & Full Stack Developer | TechieBall (https://techieball.com/) *July 2026 – Present*

- Lead business development, partnership opportunities, and monetization models for TechieBall's digital expansion.
- Architected and built the full-stack publishing platform on Next.js, Node.js, and MongoDB, with asynchronous backend queues, automated sitemap submission, and custom analytics tracking.
- Built the AivaanTech AI Academy e-learning platform and the Athmic Biotech enquiry and quotation portal, plus a multi-tenant GST billing SaaS (see Key Projects).
- Implemented programmatic SEO, structured metadata, IndexNow automated indexing, and GA4 and GTM dashboards to track engagement and conversion.

Digital Marketing & Full Stack Developer | YTS (https://www.yakriatech.com/ | https://www.ytechsol.com/) *June 2023 – June 2026*

- Managed end-to-end digital marketing for 15+ clients across India and the US, handling roughly Rs. 20 Lakhs in combined Meta and Google Ads budgets over three years, including a 3x ROAS and 80% lower CPL for Yazz Salon.
- Built and maintained 15+ production web and mobile applications using Next.js, React, Flutter, Astro, and Shopify, with Node.js and MongoDB APIs and custom admin panels for bookings, leads, and refunds.
- Grew organic traffic across client sites through technical SEO, on-page optimization, schema markup, and page-speed fixes, and improved map pack visibility with Google Business Profile and local citations.
- Integrated Razorpay, Stripe, and Square payment gateways with refund handling, webhook verification, transaction tracking, and checkout funnels.
- Managed WhatsApp Cloud API and BSP services for business clients, including API-level troubleshooting, webhook subscriptions, and Coexistence (hybrid Cloud API) migration support.
- Managed AWS deployments, DNS, storage, and messaging, and ran marketplace operations on Amazon, Flipkart, Meesho, and Blinkit.
- Developed an AI-powered Autoblog System using Node.js, Gemini API, Google Imagen API, Sharp, and GitHub Actions for automated content generation and deployment.

IT Developer & Digital Marketer | DMH *April 2023 – June 2023*

- Built the company web portal and custom web applications, and handled client digital launches, Google Business Profile setups, and local SEO.
- Led a 2-member team covering code reviews, deployment pipelines, SEO audits, and production support.

Intern (Unpaid) | DMH *October 2022 – March 2023*

- Completed an unpaid internship in web development and digital marketing, then moved into the IT Developer & Digital Marketer role at the same company.

KEY PROJECTS

1. Multi-Tenant Bill Management System (GST Billing SaaS) | TechieBall *Stack: NestJS, TypeScript, Prisma 7 (PostgreSQL), Passport/JWT, exceljs, React 19, Vite, Tailwind CSS v4, Electron, Docker Compose*

- Built a full-stack, multi-tenant billing and invoicing platform with company-scoped data isolation; every query is scoped by companyId and enforced by a tenant guard.
- Implemented role-based access control (Super Admin / Admin / User) with global NestJS guards, decorator-driven permissions, and automatic audit logging through an interceptor.
- Designed a GST calculation engine supporting add-on and inclusive tax modes, using Prisma.Decimal for precision; the tax mode locks after a company's first invoice.
- Built a Super Admin portal covering tenant provisioning, subscription lifecycle (expiry guard returning HTTP 402), platform analytics, global maintenance mode, and scheduled and on-demand database backups.
- Built an offline Windows desktop version of the billing system using Electron.

2. AivaanTech AI Academy – E-Learning Platform (LMS) | TechieBall (https://www.aivaantech.com/ | https://learn.aivaantech.com/)

Stack: React, Next.js, Node.js, Prisma, PostgreSQL, Razorpay, Bunny Stream, Cloudflare R2, DigitalOcean

- Full-stack developer on a live e-learning platform, covering the React and Next.js frontends and the Node.js, Prisma, and PostgreSQL backend.
- Built Razorpay payments and signed video delivery through Bunny Stream, with Cloudflare R2 media storage, WebP image compression, and secure cookie-based authentication.
- Set up release-based CI/CD on DigitalOcean.
- Set up conversion tracking across the main site and learning subdomain with a single GTM container (GA4, Meta Pixel, Google Ads, Clarity), drove data-driven SEO improvements, and produced promotional video and Instagram Reel ads.

3. Athmic Biotech Solutions – Enquiry, Quotation & Reporting Platform | TechieBall (https://athmicbiotech.com/) *Stack: Next.js, TypeScript, MySQL, JWT Authentication*

- Built a full-stack Next.js and TypeScript platform on MySQL with separate admin and client portals.
- Implemented JWT role-based authentication to control admin and client access.
- Delivered workflows for customer enquiries, quotations, and report delivery, plus a CMS for managing site content.

4. Cleomitra – CRM & WhatsApp Automation Platform Mobile app: https://cleomitra.app (Flutter) | Website: https://cleomitra.com (Next.js) *Stack: Flutter, Next.js, WhatsApp Business API, Exotel API, Twilio API, AI Chatbot (Amazon Bedrock)*

- Contributed to Exotel, Twilio, and WhatsApp Business API integrations and an Amazon Bedrock-powered AI chatbot.
- Enhanced Flutter mobile UI/UX, resolved app performance bottlenecks, supported customer onboarding, and assisted with the Google Play Store launch.
- Ran the organic lead funnel and SEO, reaching up to 60 organic leads per month within 3 months and 1,000+ organic visitors per month within 6 months.

5. Yazz Salon – Beauty & Wellness (https://www.yazz.in/) *Social Media Management, Local Meta Ads, Booking Funnels*

- Achieved 3x ROAS and cut Cost Per Lead (CPL) by 80% while sustaining high local appointment bookings.

6. YORA & BeGoodEarth – E-Commerce Stores (https://www.theyora.com/ | https://www.begoodearth.com/) *Stack: Shopify, Liquid, Razorpay, Stripe, Square*

- Customized storefront UI/UX, integrated Razorpay, Stripe, and Square checkout workflows, and optimized mobile store performance.
- YORA: built a B2C sales channel across Shopify and four marketplaces and generated B2B bulk-order leads of up to 1 ton per month.
- BeGoodEarth: implemented multi-region ad tracking, multi-currency checkout, and international product SEO.

7. ZHaulz – Furniture Delivery Platform (USA) (https://www.zhaulz.com) *Stack: Next.js, Node.js, MongoDB, AWS SNS, Square API*

- Architected a full-stack logistics platform for a Seattle-based US client, with admin dashboards for bookings, cancellations, full and partial refunds, and SMS notifications via AWS SNS.

8. AI-Powered Autoblog Deployment System (https://yakriatech.com) *Stack: Node.js, Gemini API, Google Imagen API, Sharp, GitHub Actions*

- Built an autonomous blog publishing engine with AI text and image generation, WebP optimization, and instant search indexing.
